SUMMARY

Data Analyst with 1.5+ years of experience in Power BI, SQL, Excel, and Python, specializing in data preparation, DAX calculations, KPI reporting and dashboard development. Proven ability to optimize data models, automate reporting and deliver actionable business insights across multiple domains.

WORK EXPERIENCE

Data Analyst | Indus Net Technologies | 2025 – Present

- Designed and deployed complex compliance dashboards for a pharmaceutical client, which resulted in a 15% increase in quality control adherence and more efficient resource utilization.
- Optimized complex Power BI data models using incremental data loading techniques, reducing data refresh time by an average of 40% across all enterprise reports.
- Engineered data ingestion and end-to-end report refresh workflows using Python scripts, saving the team 10+ hours of manual work per week.
- Designed a sales insights dashboard that enhanced forecasting accuracy by 12% and reduced overall data processing time by 2 hours per weekly reporting cycle.

Assistant System Engineer | Tata Consultancy Services (TCS) | Sep 2024 – Jun 2025

- Executed data cleaning and transformation for high-volume datasets (100K+ records) using SQL and Python (Pandas, NumPy) ensuring 99.5% data quality for analysis.
- Built interactive dashboards and visualizations using Power BI, including DAX measures, data modeling, and KPI reporting.
- Derived and presented clear, data-driven insights and recommendations from complex reports, influencing strategic decision-making for a 15-member business team.

EDUCATION

Techno Main Saltlake | Aug 2021 - Aug 2024

BCA (Bachelors of Computer Application) – 8.77/10

Maheshwari Girls School | Jul 2019 – Jun 2021

Class 12(ISC) - **86.66%** .

Class 10(ICSE) - **84.66%**.

PROJECT

Customer Trend Analysis

Examined customer transaction data to identify spending patterns, product performance, customer segments, and subscription behavior for business decision-making. Performed data cleaning, feature engineering, and exploratory data analysis, including missing value treatment, customer segmentation, and purchase frequency analysis.Executed advanced SQL analysis to evaluate revenue trends, discount impact, shipping performance, and subscriber vs non-subscriber behavior. **Built with:** Python (Pandas, NumPy), SQL (PostgreSQL), Power BI, Data Cleaning, Feature Engineering, Data Visualization.

Flight Booking and Travel Analysis

I investigated a flight booking and travel dataset to understand pricing trends, passenger demographics, and travel behavior in the aviation domain.I performed data cleaning, feature encoding, and exploratory data analysis to study relationships between ticket price, distance, duration, airline, and travel class. I built visual insights and interactive dashboards to compare airlines, departure cities, payment methods and customer preferences. **Built with:** Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, Power BI, Exploratory Data Analysis.

SKILLS

- **Power BI :** Interactive dashboards, DAX, Data Modeling, Report Automation , API Integration.
- **SQL :** Joins, complex queries, stored procedures, data cleaning, data transformation.
- **Python:** Pandas, NumPy, Matplotlib, Seaborn, exploratory data analysis (EDA), data visualization.
- **Excel:** Pivot tables, advanced formulas, Power Query, data analysis.
- **Data Visualization & Reporting:** Performance tracking, business insights, stakeholder reporting.

CERTIFICATIONS

- Certification in Data Analysis in Python – IBM
- Certification of Data Analyst – One Roadmap
