THAVAMANI T

Data Analyst and Machine Learning Engineer

thavamani074@gmail.com +91-9025386572 Bangalore, India

Professional Summary

Highly motivated and results-oriented Data Scientist and Machine Learning Engineer with 1.5 years of experience in data analysis, predictive modeling, and deep learning. Proven ability to develop and deploy machine learning models, including experience with regression, classification, and object detection. Expertise in Python, SQL, Power BI, and modern ML frameworks. Passionate about leveraging data-driven insights to optimize business operations and drive strategic decision-making. Seeking to contribute to innovative projects in data science and machine learning, with a focus on cloud computing AWS and Natural Language Processing (NLP).

Professional Experience

Operations Executive

2025-08 – 2025-12

Flipkart | Innovsource Services Pvt. Ltd.

- Managed widget creation and deal card management for Flipkart products, ensuring timely and accurate product listings.
- Oversaw catalog operations and promotions, contributing to a 15% increase in product visibility.
- Improved operational efficiency in product display and visibility, resulting in a 10% reduction in catalog management time.

Associate Data Analyst

2022-10 - 2023-09

Xerago

- Developed interactive Power BI dashboards for monitoring campaign KPIs, providing real-time insights to stakeholders.
- Automated ETL pipelines, improving reporting accuracy by 20% and reducing manual effort.
- Conducted SQL-based segmentation using HCL Unica, resulting in a 12% increase in campaign conversion rates.
- Executed digital marketing campaigns for ZEE5 using CleverTap, optimizing user engagement and driving a 8% increase in click-through rates.
- Conducted A/B testing to enhance conversion rates, leading to a 5% improvement in overall campaign performance.

AI VariantExcelR (Online) 2025-05 - 2025-08

- Developed a Car24 Price Prediction Project using Linear Regression, building predictive models to estimate car resale prices.
- Conducted data cleaning, preprocessing, and feature engineering on large datasets.
- Evaluated models with regression metrics, achieving an R-squared score of 0.85, ensuring reliable price predictions.

Machine Learning Intern

2024-08 - 2024-09

Kadit Innovations

- Built a YOLOv5-based object detection model to classify LEGO bricks (shape, size, color).
- Achieved 90% accuracy (F1-score) with optimized CNN for real-time classification, improving the efficiency of the classification process.

Data Analyst Intern

2024-04 - 2024-07

Finkraft

- Designed Zoho Analytics dashboards for data visualization and decision-making.
- Conducted exploratory data analysis (EDA) to uncover insights, identifying key trends and patterns in the data.

Short-Term Trainee

2018-01 - 2018-10

Delphi TVS

- Worked as a testing engineer in the IDI pump assembly process.
- Managed production flow in filter cell seaming for operational efficiency, contributing to a 5% reduction in production time.

Education

B.E. – Mechanical Engineering Sardar raja college of engineering :- 6.78

HSC – Mathematics + Computer Science Ramakrishna Matriculation Hr. Sec. School:- 69%

SSLC Ramakrishna Matriculation Hr. Sec. School:- 75%

Skills

- Python (Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch)
- Prompt Engineering
- ETL Pipelines

- SQL (SQL Query Optimization)
- Power BI (Reporting & Visualization)
- Data Analysis
- Machine Learning (Regression, Classification, Model Development)
- Data Visualization
- OpenCV
- YOLOv5
- CNNs
- GPT-based workflows
- Zoho Analytics
- Advanced Excel
- SFMC
- HCL Unica
- CleverTap
- Data Extraction & Transformation
- Data Preprocessing
- Advance Excel(Basic Macro & Reporting)
- Natural Language Processing (NLP)
- Deep Learning
- Photopea
- Flipkart-Neo(Contact creation)
- Time Management

Certifications

- **Data Science Certification – ML & Predictive Modeling (ExcelR)**

  Deep Learning and AI
- **SQL Certification – Advanced Querying**
- **Power BI – Reporting & Visualization**
- **HCL Unica – Campaign Management**

PROJECT

Car24 Price Prediction (ExcelR Internship)

- Built and validated a Linear Regression model for predicting used car prices.
- Preprocessed and standardized large datasets for training and validation.

Real-Time LEGO Object Detection System

- Developed end-to-end object classification pipeline using CNN + YOLO.
- Improved accuracy through hyperparameter tuning.

ZEE5 Campaign Performance Optimization

- Extracted and analyzed campaign data via CleverTap.
- Improved segmentation and targeting for better user engagement.
